

"Preserving Our Heritage - Protecting Our Future"

Subject: Counterterrorism Training Opportunity

The banner for CTOS (Counterterrorism Operations Support) features a dark blue background with a large white "CTOS" logo and the text "Counterterrorism Operations Support" to its right. On the left is a circular seal with a radiation symbol and the words "COUNTERTERRORISM OPERATIONS SUPPORT". Below the logo are three small images: two men in tactical gear talking, a man in a blue shirt standing in a room with green seats, and a person in a white hazmat suit handling a container.

Training Built By Responders For Responders

Instructor-led Online Course Delivery

Counterterrorism Operations Support (CTOS) is providing an exciting new training option: Instructor-led online course delivery! CTOS Instructors deliver this live training using the Webex platform. Exams are provided online through the CTOS Learning Management System (LMS). Our goal is to provide a course that allows Participants to complete their course work using a flexible schedule—*completely* online.

At this time, CTOS is offering *AWR-140*, Introduction to Radiological/Nuclear WMD Operations. The course is approximately 3 hours in length. Available courses and dates are:

April 1, 2021 at 0900 EST

April 8, 2021 at 1200 EST

April 15, 2021 at 1200 EST

April 22, 2021 at 1200 EST

April 29, 2021 at 1800 EST

[Signing up is easy. Visit the CTOS LMS, register or sign-in,](#)

Click on the course catalog and locate WBT Web-EX02 series for AWR-140, select the date you would like to attend, and complete the pretest prior to the start date of the course. Approximately 2 days before the course begins, CTOS will email the WebEx log-on instructions and class materials to all Participants who have completed the pretest. On the date of the course, you will sign in and join the Instructor. The final exam and student assessment will open after the Webex portion of the course has concluded, and it will remain open for a week to provide Participants adequate time to complete the course requirements.

The courses provide the Participant with the fundamental knowledge of radiation, the ability to recognize a radiological or nuclear incident, the knowledge to respond safely, and the ability to minimize health risks from such incidents.

Contact us today to discuss other courses available to you and your agency. ctosmttreg@nv.doe.gov
